Design und Trends

Die Trends hat SCHWINN sicher im Griff. Mit einem innovativen Design-Monitoring durch Trend-Scouts schaffen wir es immer wieder Anreize für die Möbelbauer zu schaffen. Ob Used-Look, Holz/Metall-Kombinationen, weiche Formen oder neueste Oberflächen – den Trend-Scouts entgeht nichts. Aus bis zu 450 Ideen pro Jahr kreieren die Schwinn Designer über 100 neue Modelle. Das Design prägt und individualisiert die Gestalt eines Möbels. Schwinn Griffe geben Ihm den nötigen Charakter.

Design and Trends

Schwinn has a strong grip on trends. Through our innovative trend monitoring process we are able to give furniture designers and manufacturers a steady flow of new impulses. From used-look, wood-metal combinations, and soft shapes, to the newest developments in finish technologies, our trend scouts detect and capture them all. From over 450 concepts we create over 100 new products each year. Design shapes and individualizes the identity of furniture. Schwinn handles help define its character.

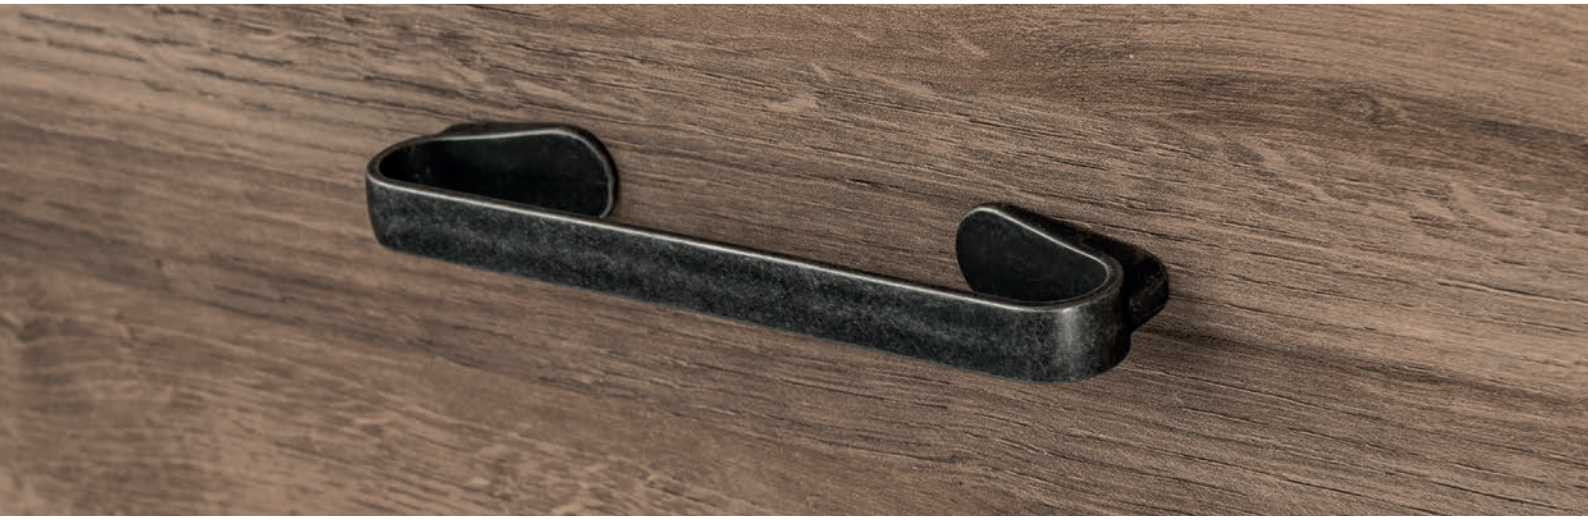

Design et Tendances

Les tendances sont décelées par un Design Monitoring innovant. Aussi nous avons toujours de quoi surprendre et intéresser les fabricants de meubles.
Que les finitions et les formes soient modernes, vintage et/ou naturelles, elles sont systématiquement décelées. Aussi nous étudions 450 idées par an et créons 100 nouveaux modèles.
Le Design permet une individualité du meuble. Les Poignées Schwinn lui donne son caractère.

Design e Trends

La SCHWINN conosce bene i trends del momento.
Grazie ad un monitoraggio continuo da trends scout, riusciamo sempre a suscitare l'attenzione del creatore di mobili.
Al trends scout non sfugge nulla! E' sempre attento a "used-look", combinazioni legno/metallo, forme morbide e finiture innovative.
I designers Schwinn creano più di 100 nuovi modelli all'anno.
Il design di SCHWINN caratterizza e identifica il mobile.

Trend Edelstahl

Neben den Oberflächen-Trends wie Kupfer oder matt Nickel belegt Edelstahl schon seit einigen Jahren als Werkstoff die vorderen Plätze. Er kommt in vielen Wohn-Bereichen zum Einsatz, sei es bei Küchenmöbeln, Sitzmöbeln, als Material für Treppengeländer oder auch als Arbeitsoberfläche. Grundsätzlich bezeichnet Edelstahl eine Gruppe von rund 160 verschiedenen Stahlarten, die rostbeständig sind und sich aus mehreren Bestandteilen zusammensetzen. Der Begriff kommt daher, dass Edelstahl eine spezielle Veredelung besitzt: Eine sehr dünne Schicht aus Chromoxyd sorgt für die enorme Robustheit des Materials und dafür, dass Rost normalerweise keine Chance hat. Gebürsteter oder auch geschliffener Edelstahl besitzt eine moderne und hochwertige Anmutung, aber auch die Funktionalität und Langlebigkeit wird in vielen Bereichen geschätzt. Außerdem zeichnet sich rostfreier Edelstahl durch eine besonders glatte und inerte Oberfläche aus, die keine Ionen abgibt. Eine Reaktion mit dem Luftsauerstoff oder Reinigungsmitteln gibt es nicht. Diese dauerhaft gleichbleibende hohe chemische und mechanische Beständigkeit von rostfreiem Edelstahl gewährleistet konstant zuverlässige Qualität, Hygiene und Ästhetik.

Mit unseren SCHWINN – Edelstahl-Griffkollektion liegen Sie damit immer voll im Wohntrend.

Trend stainless steel

Copper and satin nickel are trending but for years stainless steel has been in the top of the list of the materials and finishes. The many uses of this versatile material range from kitchens, seating, railings to counter tops and more. Stainless steel is a category name for over 160 different steel alloys that are rust resistant. Chromium is the element that gives this steel its strength and prevents it from rusting. Brushed and polished finishes create a contemporary look and feel and and add to the durability and functionality of stainless steel. Its smooth and inert surface dos not release any ions and does not react to water or cleaning products. The continuously high chemical resistance and mechanical durability provide long lasting aesthetic, functional, and hygienic quality.

With Schwinn stainless steel products you are always on trend.

Tendance Acier Inox

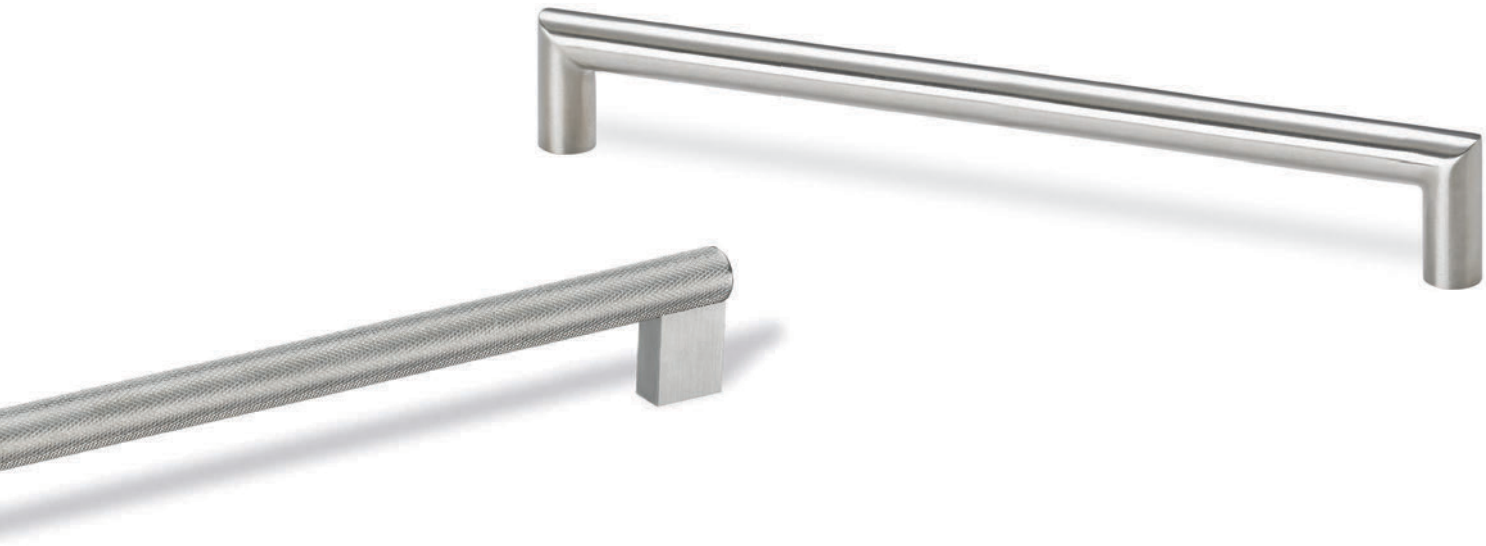

Aux côtés des tendances cuivre et champagne, l'acier inox se positionne en première place depuis plusieurs années. Son utilisation est multiple et on le retrouve dans la cuisine, le meuble meublant et le siège. Le terme général Inox regroupe 160 types de métaux, qui d'une part ont une propriété anti rouille et d'autre part sont composés de plusieurs éléments. Ses propriétés sont dues à une couche d'oxyde de chrome d'une extrême finesse, qui apporte, outre une énorme solidité, une tenue anti corrosion. Sa surface étant lisse et inerte, elle ne génère aucun ion. Brossé ou poncé, il va non seulement offrir une présence de haut niveau, mais aussi une fonctionnalité durable, et une résistance à l'oxydation et aux produits d'entretien. Ceci lui confère une hygiène et une esthétique constante et inégalée.

Avec nos produits SCHWINN Collection Acier Inox vous pouvez être sûr d'être dans la tendance.

Trend della finitura in acciaio

Già da diversi anni, oltre alle tendenze del rame e del nichel opaco, ai primi posti c'è la finitura in acciaio. Viene inserita in diversi ambienti, come materiale per i passamano, nel mobile da cucina, nelle sedute, e come piano di lavoro.
Fondamentalmente si parla di acciaio inossidabile, un gruppo di circa 160 differenti tipi di acciaio, resistenti alla corrosione.
Il termine acciaio inossidabile, poiché trattasi di una finitura speciale, ovvero di uno strato molto sottile di cromo, che ne conferisce la robustezza e quindi l'impossibilità di essere intaccata dalla ruggine.
L' Acciaio spazzolato o l' acciaio lucidato: aspetto moderno, alta qualità, funzionalità e soprattutto longevità in molti settori.
Inoltre, l'acciaio inox è caratterizzato da una superficie particolarmente liscia, che non emette ioni.
Non si conoscono reazioni con l'ossigeno, gli agenti atmosferici e/o i detergenti.
Questo costante ed elevata resistenza chimica e meccanica dell'acciaio inossidabile, assicura qualità sempre affidabili, igiene ed estetica.

Con la gamma di maniglie in acciaio SCHWINN siete sempre al top.

Antibakterielle Möbelbeschläge

Eine neue Oberflächenbeschichtung, die das Wachstum von Bakterien, Pilzen und Keimen auf natürliche Weise verhindert, bietet einen innovativen Zusatznutzen zum Design und der Qualität von Schwinn Möbelgriffen.

Hygiene ist ein zunehmend wichtiges Thema für viele Menschen. Über 80% aller Erwachsenen haben heutzutage Bedenken wegen der Verbreitung von Mikroorganismen wie Bakterien und Pilzen. Silber wird schon seit Jahrhunderten zur Bekämpfung einer ganzen Reihe von Mikroorganismen verwendet. Es wirkt auf natürliche Art und Weise und seine erstaunliche Wirksamkeit ist ausführlich in der Literatur dokumentiert. Eingekapselte Silberionen die sich langsam und kontinuierlich an die Oberfläche bewegen, bekämpfen Mikroorganismen und halten die Schwinn AM® Möbelbeschläge antibakteriell geschützt. Ein hocheffektiver Schutz, der solange die Beschichtung auf dem Griff ist zuverlässig anhält.

Die Beschichtung der Schwinn AM® Griffe besteht aus dem zertifizierten Pulverlack des Herstellers Agion©.
Sollten Sie weitere Informationen zu Schwinn AM® wünschen oder Fragen haben, senden Sie bitte eine E-Mail an info@schwinn-beschlaege.de

Weitere Informationen unter:

agion®

www.agion-tech.com

Für Artikel aus Metall als farblose Beschichtung in matt und glänzend auf Anfrage erhältlich.

Available on request for products made of metal as a colorless coating in mat and shiny.

Pour les articles en métal, en mat ou brillant, cette finition incolore est disponible sur demande.

Elementi metallici con rivestimento incolore opaco e lucido su richiesta.

Antimicrobial Furniture Fittings

A new finish coating that inhibits microbial growth adds the value of product protection to the design and quality of Schwinn Hardware.

Concerns about cleanliness and microorganisms such as bacteria, yeast, fungi, mold and mildew are widespread. In fact over 80% of today's adults share these concerns. To fight a wide range of microbes, silver has been known and used for centuries. It is naturally effective and its efficacy is scientifically well documented. It is "Green." And it is what powers Agion® Antimicrobial. Encapsulated silver ions, slowly released to the surface, fight microorganisms to keep Schwinn AM® Antimicrobial
Protected Furniture Hardware clean. A highly effective product protection that works around the clock and lasts the lifetime of the finish.

The Agion Antimicrobial is not intended as a substitute to good hygiene. It does not protect users or others against diseasecausing.

Poignées antimicrobiennes

Une nouvelle finition, qui empêche de façon naturelle la prolifération des bactéries, moisissures et germes offre un effet supplémentaire
innovant au design et à la qualité des poignées de meubles Schwinn.
L'hygiène est un sujet de plus en plus important pour beaucoup de consommateurs. De nos jours, plus de 80% des adultes sont préoccupés par le développement de micro-organismes comme les bactéries et les moisissures. L'argent a depuis toujours été utilisé pour lutter contre toute une série de micro-organismes. Il agit de façon naturelle et son étonnante efficacité a déjà été documentée dans de nombreux écrits scientifiques. Des ions d'argent encapsulés, qui évoluent sans cesse à la surface, luttent contre les micro-organismes et offre aux poignées traitées par Schwinn AM® une protection antibactérienne prolongée.
La finition des poignées Schwinn AM® est une poudre epoxy certifiée du fabricant Agion®.
Pour toute information supplémentaire au sujet de Schwinn AM®, merci d'adresser votre demande par mail à :

Accessori antibatterici

Una nuova finitura che impedisca la crescita di batteri, di funghi
e di germi, conferisce senz'altro un innovativo valore aggiunto alla progettazione ed alla qualità delle maniglie Schwinn.

L'igiene è un problema sempre più importante per molte persone.
Circa l'80% degli adulti oggigiorno sono sempre più preoccupati
per la proliferazione di microrganismi come batteri e funghi.
L'argento è stato usato per secoli per combattere un'ampia varietà di microrganismi. Agisce in modo naturale e la sua efficacia è sorprendente e ben documentata in letteratura.
Ioni d'argento incapsulati che si muovono lentamente e continuamente sulla superficie, per combattere microrganismi e garantire la protezione antibatterica per tutti gli accessori per mobili Schwinn AM®.
Una protezione altamente efficace finché dura il rivestimento superficiale del prodotto.

Il rivestimento delle maniglie Schwinn AM® consiste nella produzione certificata della verniciatura a polvere Agion®.
Se avete bisogno di ulteriori informazioni su Schwinn AM® o se avete domande, potete inviare una e-mail a
info@schwinn-beschlaege.de

Schwinn Service

Sie nennen uns Ihr gewünschtes Sondermaß, wir längen Ihr Produkt passgenau ab, konfektionieren es und liefern es einbaufertig zu Ihnen.

We cut to size, finish and ship the ready-to-assemble product to you.

Donnez nous vos mesures et nous livrerons les articles prêt à poser.

Comunicateci la lunghezza desiderata e vi forniremo gli articoli su misura.
